

EXPLORING CAREER IN MATH SERIES

11:10 AM - 1:30 PM, SEPTEMBER 28TH, 2023

ARM-ROOM 208

Mr. Nick Sanchirico

Nick is currently a principal software engineer for EpiSci, a defense company focused on AI-based autonomy. He has years of experience in both the defense industry and the fintech sector. In his current role, Nick helps design and implement high performance software for unmanned autonomous vehicles. This work requires that code and algorithms are implemented as efficiently as possible to aid in real-time decision making.

Nick is also a part-time lecturer for the Department of Mathematical Sciences, specializing in scientific computing and data visualization.
